BIKE WASHING
FOR YOUR BIKE

PROFESSIONAL WASHING FOR YOUR BIKE

You wash your hands with soap. Cars go to the car wash.
And bikes? They go to BikeGroovy.

If you love your bike, you wash it too.

Cycling is booming. More people than ever are riding bikes - on race tracks, cycle paths, trails, downhill runs and in bike parks. Bikes are more capable than ever, with prices to match. We take care of these bikes. We value them and keep them clean. Now, the best way is with BikeGroovy.

A new dimension in bike care.

Just 1.8 litres of water per minute: barely any consumption at all.

Low-pressure washing is gentle on e-bikes, bearings and components. Your bike will thank you!

Quickly dry the chain and components with compressed air. Add a few drops of chain oil, and you are ready to enjoy your next ride.

The dosing pump ensures the precise ratio of cleaning agent to water.

The splash guard keeps the washing area as clean as your freshly washed bike.

Compact design in corrosion-resistant stainless steel. 2500 x 850 x 1600 mm (L x W x H).

The separator removes mud and oil from water - because we care about nature.

Instantaneous water heaters provide warm water for washing, even where there is no hot water connection nearby.

OPTIONAL MODULES

Want a little more groove?

Configure BikeGroovy to meet your exact needs with a range of tailored optional modules.

BikeGroovy generates revenue through a coin mechanism and runs for exactly as long as you choose.

Why lift heavy bikes when the practical Roll and Hold package can spare your back?

Prefer a more modern option? A convenient cashless payment system lets users pay by card or mobile phone.

If BikeGroovy is too far from a compressed air supply, there is space inside for a small compressor.

Mobile BikeGroovy? Absolutely! Four castors let you wash bikes wherever you want. As standard, BikeGroovy stands on six fixed feet.

Groovy Berta delivers sparkling results. This biodegradable cleaning agent is gentle on bikes and kind to the environment.

BikeGroovy can also be adapted to your site and needs, including its configuration (right or left), language (decals) and design.

BikeGroovy does more than clean: it promotes your business with custom branding designed to suit you.

BENEFITS

A new dimension in bike care!

BikeGroovy draws on 25 years of pioneering work in cleaning technology and industrial systems. It combines a passion for cycling with high-quality components, robust design and outstanding craftsmanship.

Spotless results

BikeGroovy uses a clever combination of heat and detergent to tackle even the most stubborn dirt.

Gentle cleaning

Low-pressure washing combined with detergent and hot water ensures gentle cleaning with outstanding results.

A clean solution

The splash guard and collection tray keep the washing area clean, while the surroundings and the user stay dry. An integrated separator removes mud and oil from the water - another benefit for the environment!

before

after

BikeGroovy Eco: extra sustainability

Muscle power, coordination and perhaps a little battery power: cycling is inherently resource-efficient. BikeGroovy takes this principle further with low water consumption, an oil separator and a biodegradable cleaning agent.

APPLICATIONS

Added value for cyclists. And their hosts.

Many cyclists enjoy riding through mud. But heading home with a dirty bike? Nobody wants that.

For hotels, wellness facilities and campsites

Tourism professionals and hoteliers have long known that service makes all the difference. The same applies to cycle tourists and mountain bikers among their guests. BikeGroovy helps your services stand out: guests can wash their bikes easily after a ride. The washing area stays clean and dry - and well-kept surroundings reflect the quality of your business. Custom branding is available, of course.

For towns, municipalities and tourism associations

Cyclists are an attractive audience who spend money where their needs are met. The chance to give their bikes the care they deserve after a ride and before heading home is a rare find. Visitors to a cycling destination appreciate this gesture of hospitality. And post-ride food and drinks taste even better when you know your bikes are clean and well cared for.

For bike workshops and rental businesses

BikeGroovy's technical features make it a natural partner for any bike workshop or rental business. Before servicing or after a ride, it thoroughly cleans bikes while keeping the surrounding area dry. The ideal balance of detergent, water and temperature, combined with gentle pressure that protects bearings, drivetrain components and other sensitive parts, saves time and resources while delivering a thorough clean.

CUSTOMER TESTIMONIALS

We believe in BikeGroovy, but the views of satisfied users matter even more to us!

Our customers are best placed to judge just how good BikeGroovy really is:

"We use the system every day and love seeing satisfied customers collect their perfectly clean bikes after servicing. It works flawlessly, and we are delighted to offer this service!"

David Weichel
KW-BIKES TEAM, GELTING, GERMANY

"For a busy bike workshop, cleaning bikes quickly and reliably is essential. BikeGroovy lets us clean thoroughly while protecting the environment and conserving resources."

Josef Lontscharitsch
HEAD OF THE RADLA CYCLING DEPARTMENT, GRASSINGER E. U.

"I wanted a clean solution for my rental bikes. With BikeGroovy, I found the perfect washing system: clean for the bike, clean for the environment and clean for my customers."

Bernhard Mildner
KALOVEO BIKE HIRE, TRAUN, AUSTRIA

"Honestly, washing bikes is not my thing. BikeGroovy is much better at it. My pride and joy has not been this effortlessly clean in ages. It is gentle on the rear derailleur and bottom bracket too. As someone who cares about nature, I love the extra benefit: it separates oil from water!"

Arno Hochsteiner
YEAR-ROUND CYCLE COMMUTER

"We want to offer added value to visitors to our municipality. The BikeGroovy bike wash is the perfect addition to the Haager Lies cycle route and the nearby pump track."

Andreas Obermair
MAYOR OF NEUKIRCHEN BEI LAMBACH, AUSTRIA

"We needed to clean our guests' bikes after rides. BikeGroovy was the only product that cared for nature by separating oil and coarse dirt from the water. The controlled pressure and hot water also made a difference. After two years, we are very happy with our choice and recommend it to fellow hoteliers."

Silvio Rigatti
OWNER, AKTIVHOTEL SANTA LUCIA, TORBOLE, LAKE GARDA, ITALY
